

## Certificate of Commendation - World ADC Awards

### **BSP Pharmaceuticals** Winner 2016

#### *Best Contract Manufacturing Organization*

It is with pleasure that I am writing to confirm that BSP pharmaceuticals have, for the second year in a row, been selected as winner in the “Best Contract Manufacturing Organization” category at the 2016 World ADC Awards.

This year over 1500 nominations were made by the ADC community to recognize the innovation, leadership and devotion shown by the best companies, teams, and individuals in the industry.

For the “Best Contract Manufacturing Organization” entrants were assessed based on their reliability, value, service range, investment and commitment to ADCs and uniqueness in the market..

BSP Pharmaceuticals’ entry impressed the judging panel throughout. We first created a long-list of relevant CMOs working in the ADC space through research with the industry. This list was hosted on survey monkey and we asked people to vote for who they thought should be in the running to receive an award. The five companies with most votes in each category were shortlisted for the finals. We invited these shortlisted companies to complete a proposal that provided evidence on why they should be considered as winners for the award. Our three main judging panel reviewed these and anonymously ranked the results. These ranking were used to create provisional placements. A final conference call was then conducted to debate this and determine the final standings.

The decision to award first place was again unanimous amongst the judges. The continued investments in their facilities were key evidence for the judges as they considered the merits of BSP. The number of ADC candidates already produced at the facilities as well as the capability for commercial manufacture also all factored into the final decision.
